Plano, TX

.NET DEVELOPER

Throughout my career as a software developer I've focused on writing clean and maintainable code. I am excited about the prospect of joining a product-driven company like Daisey Brand.

SKILLS

C#
.NET Core
.NET Framework

SQL
Entity Framework
JavaScript

CI/CD (Railway, Azure DevOps)
React/Redux
HTML/CSS/Bootstrap

PROFESSIONAL EXPERIENCE

FIRST

September 2022 - Present

Software Developer

- Works in an agile environment participating in code reviews, sprint retrospectives and ticket grooming
- Uses C# and JavaScript to maintain .NET Framework and .NET Core applications
- Creates and updates existing MySQL stored procedures
- Evaluates interrelationships between programs
- Lead knowledge transfer of externally developed ReactJS/.NET Core application from external development team
- Developed reporting feature in the payment engine to give accounting additional data on users

Bugtracker

December 2021- August 2022

Portfolio Project

- Developed web application for companies to track their software development projects
 - Implemented role-based authorization to allow administrators to create projects and assign project managers to them. These project managers can assign developers and track the status and priority of tickets. Ticket members can leave comments, upload files attachments, and receive email notifications.
 - Built with C#, .NET Core 5 MVC, Entity Framework, PostgreSQL and JavaScript
-

EDUCATION

Buffalo State College

Computer Information Systems

2018-2020

Coder Foundry

.NET Full Stack Development Bootcamp

2020-2021
